VIDEOGRAPHY

Our heart behind what we do is to provide you with a record of the most important day in your life. Not a video you watch once and forget about; but a movie featuring you, your family and friends telling the story of a couple coming together.

Many of our clients watch their WeddingMovie years after their wedding and love remembering everything that happened on their special day in detail.

We use the latest in High Definition technology to film and edit your WeddingMovie. With your choice of music and our talented editors, we edit your movie with modern stylish effects (not the corny ones) to produce a stunning movie of your wedding day.
